EDUCATION

Centre for Development of Advanced Computing (C-DAC), Kharghar Feb 2025 – Aug 2026
Post Graduate Certificate Programme in Advanced Computing (PGCP-AC)

Master of Computer Applications (MCA) Sep 2023 – Sep 2025
SIES College of Management Studies, Mumbai 68.68%

Bachelor of Science in Computer Science Aug 2020 – Mar 2023
Pillai College of Engineering, Navi Mumbai 9.18 CGPA

TECHNICAL SKILLS

Languages: Java, C++, C#, SQL, Python

Frontend: React.js, HTML, CSS

Backend: Spring Boot, Spring Security, ASP.NET Core, REST APIs

Databases: MySQL, MongoDB, PostgreSQL

Technologies & Tools: Git, GitHub, Docker, AWS, JWT, Maven, Entity Framework Core, Hibernate, Power BI, Metabase

Core Concepts: OOP, SOLID Principles, Design Patterns, MVC, Data Structures, JPA

ADDITIONAL TRAINING & CERTIFICATIONS

Data Analytics and Reporting – TCS iON Nov 2022 – Jun 2023

- Completed a training program covering data analytics, statistical analysis, business intelligence, and reporting.
- Worked on practical data analysis projects using real-world datasets and reporting methodologies.
- Attended live sessions conducted by experienced faculty and industry professionals.

KEY PROJECTS

EarthScan Bharat – Smart Land Intelligence Platform Jul 2026

C-DAC Final Project

- **Technologies:** ASP.NET Core, Spring Boot, React.js, MySQL, Entity Framework Core, Spring Data JPA, Hibernate, JWT, Docker, AWS.
- Developed a full-stack Smart Land Intelligence Platform enabling farmers and land buyers to make data-driven decisions using land analysis, groundwater information, borewell feasibility, mandi prices, government schemes, crop recommendations, and investment analysis.
- Designed a scalable multi-tier architecture with JWT-based authentication, role-based authorization, RESTful APIs, multilingual support, and responsive React.js interfaces.
- Applied OOP, SOLID principles, design patterns, Entity Framework Core, Spring Data JPA, and Hibernate for maintainable business logic and efficient database interaction.
- **Repository:** [GitHub Repository](#)

NEIRP – National Electoral Intelligence & Revision Platform Jul 2026

Academic Project

- **Technologies:** C#, ASP.NET Core, React.js, Python, FastAPI, PostgreSQL, JWT, Docker.
- Developed a full-stack electoral revision platform to automate PDF electoral roll ingestion, OCR-based data extraction, fuzzy matching, and household relationship clustering.
- Designed a scalable multi-tier architecture with JWT authentication, role-based authorization, responsive dashboards, and microservice-based integrations.

- Applied OOP, SOLID principles, Dependency Injection, DTOs, and design patterns to improve maintainability, scalability, and testability.
- Optimized heavy data comparison queries to improve processing performance and deliver results efficiently.
- **Repository:** [GitHub Repository](#)

EcoWaste – Waste Management Portal

- **Technologies:** Java, Spring Boot, Spring Security, React.js, JWT, Spring Data JPA, Hibernate, MySQL, REST APIs, Maven.
- Developed a full-stack Waste Management Portal enabling citizens to register waste complaints and pickup requests while allowing administrators and staff to manage assignments, complaint resolution, and collection operations.
- Implemented JWT-based authentication and role-based authorization for Admin, Staff, and Citizen users with secure REST API communication and BCrypt password encryption.
- Designed a layered MVC architecture following SOLID principles and the Repository Design Pattern using Spring Data JPA and Hibernate.
- **Repository:** [GitHub Repository](#)

Bahmni Healthcare Management System

Jan 2022 – Jul 2023

PLIT Solutions LLP

- Worked on enterprise healthcare data integration involving OpenMRS, OpenELIS, and Odoo platforms.
- Created dashboards for clinical analytics, patient tracking, healthcare reporting, and operational metrics.
- Worked with SQL and Metabase to support data analysis and business intelligence reporting.
